Athletics Usage Guide

DEFINITIONS

CLEANING

Physically removing all dirt and contamination, oftentimes using soap and water. The friction of cleaning removes most germs and exposes any remaining germs to the effects of a sanitizer or disinfectant used later.

SANITIZING

Reducing germs on inanimate surfaces to levels considered safe by public health codes or regulations. *Sanitizing may be appropriate for food service tables, high chairs, toys, and pacifiers.*

DISINFECTING

Destroying or inactivating most germs on any inanimate object, but not bacterial spores. Disinfecting may be appropriate for diaper tables, door and cabinet handles, toilets, and other bathroom surfaces.

DETERGENT

A cleaning agent that helps dissolve and remove dirt and grease from fabrics and surfaces. Soap can be considered a type of detergent.

DWELL TIME

The duration a surface must remain wet with a sanitizer/disinfectant to work effectively.

GERMS

Microscopic living things (such as bacteria, viruses, parasites and fungi) that cause disease.
